

ON LOCATION CLEANING:

Hydro Tek has specifically engineered systems for on-site construction cleaning.

The versatile self-contained Pro-Tow-Wash trailer system allows cleaning at remote sites where electric power or water is not convenient or available. Quickly clean your dirt haulers, trucks, drill-rigs and pavers with high pressure hot water.

Hydro Tek is the proven choice for construction professionals for in-field cleaning.

EQUIPMENT MAINTENANCE:

Hot water and high pressure is the perfect combination to solve your heavy equipment cleaning needs. Quickly wash away dirt, grease and grime enhancing the performance and longevity of your equipment while reducing fire hazards from grease build-up.

Contain wastewater runoff:

We have the solution to containing and recycling your used wash water. The Hydro Loop series provides several solutions to containing and/or recycling your used wash water whether in the field or at the yard.

CONSTRUCTION PREPARATION:

We provide the solution to prepare your construction project for completion and final release. Our portable or trailer mounted hot-water pressure washers clean and wash tilt-up concrete walls and remove dirt and tire marks from other surfaces.

Drive-way and residential clean-up on new construction is essential for turning the final job into a presentable project. Our trailer and portable pressure washers clean and quickly wash paint and drywall splatter, and tire marks from driveways and garages.

CONSTRUCTION CLEANING

Hydro Tek listened to construction professionals and produced several solutions for everyday heavy-equipment pressure washing.

Our engineers designed pressure washers for continued performance and durability to withstand the dirt and abuse encountered at tough cleaning jobs in the construction industry. Our trailers and pressure washers are manufactured with heavy-duty, high-quality components that have been proven for off-road use. You can tackle any cleaning task necessary with your choice of gas, diesel, electric or natural gas/L.P. pressure washers. We manufacture stationary, portable or trailer mounted pressure washers for a wide range of construction needs and offer single or tandem axle trailers with 200, 300, 400 and 500 gallon water tanks.

Your local Hydro Tek distributor can show you the solution to your construction cleaning needs.

HYDRO TEK ADVANTAGE:

- ◆ Field Proven for over 20 Years In Construction
- ◆ Faster Cleaning With High Output Hot Water
- ◆ Portable Diesel Engine and Diesel Fired Units
- ◆ Belt Drive Models For Water Tank Draw At Remote Sites
- ◆ Supported by a Network of Service Professionals
- ◆ Certified Safe by Industry Leaders

IN-FIELD PORTABLE

SC30005DH + TRAILER

Self-Contained Trailer Pressure Washer

Hot pressure wash at any construction site with this trailer mounted, self-contained pressure washer engineered and designed for in-field cleaning at your remote location. When water and electricity are not available, the ProTowWash™ trailer system is your solution. The pressure washer is diesel powered with a diesel fired burner and on-board generator for powering external devices.

Features...

- 3000 PSI
- 5 GPM
- Up to 200° F
- Generator
- 185 - 540 Tank
- Diesel Powered
- 115v Diesel Burner

Options...

Recycle Unit, Hose Reels
Also Available with Gas Engine

SS30005VH

Gas Powered, Diesel Fired Hot Pressure Washer

This high powered pressure washer can be portable (with optional wheel kit) or truck mounted for on-site cleaning. The heavy-duty gas powered engine and diesel fired burner offer exceptional cleaning performance without the need for external power.

Features...

- 3000 PSI
 - 5 GPM
 - Up to 250° F
 - Gas Powered
 - 12v Diesel Burner
 - Compact Design
- Options... Wheel Kit, Water Tank, Trailer

CP40004 Series

Gas Powered Portable Cold Pressure Washer

This cold pressure washer is easy to lift and move where ever you need it. It is designed for construction jobs with long duty cycles with a two cylinder engine and extra capacity fuel tank. This unit is capable of handling the largest paint preparation jobs, aggregate removal, or other cold water cleaning.

Features...

- 4000 PSI
 - 4 GPM
 - Stainless Steel Cage
 - V-Twin Gas Engine
- Options... Wheel Kit, Electric Start (#CP35005V)

STATIONARY CLEANING/RECYCLING

HD22004E2C

Portable Electric Pressure Washer

Clean equipment with this affordable electric hot pressure washer wherever you have a power outlet at your facility. Designed for performance with a powerful industrial motor, adjustable temperature with steam setting, and a diesel fired burner.

Features...

- 2200 PSI, 3.5 GPM
- Up to 250° F With Steam
- Portable and Versatile
- Diesel Fired Burner
- 208/230v 1 Phase Power

HN30005 Series

Stationary Natural Gas Electric Pressure Washer

Equipment cleaning is made very convenient at your wash bay with this electric powered natural gas hot pressure washer. It's ready to work when you are without the need to search for a water connection, refill the fuel tank or light the burner. The stainless steel construction, industrial components and belt drive pump delivers longevity with minimal maintenance.

Features...

- 3000 PSI, 5 GPM
 - Automatic Electronic Ignition
 - Low Emissions Burner
 - Pivoting Cover for Easy Access
 - 208/230/460v 3 Phase
- Options: Hose Reel, Propane Kit

HYDRO LOOP WASH - CONTAIN - RECYCLE

RPMMUAE2 Wastewater recycle and clarification

This is a fully automated 24 hour solution to comply with stringent environmental issues concerning wash water regulations. This system is designed to treat moderate to heavy loads of wash water containing solids and oils.

Features...

- High Water Purity (5 m)
- Zero Discharge
- Water Conservation
- Industrial Components
- Easy Maintenance
- Oil / Solids Separation
