

ROTARY SURFACE CLEANERS

- driveways, drive-thrus
- patios, garages
- concrete sidewalks
- school yards
- factory & warehouse
- restroom floors
- food processing floors
- service stations
- concrete parking lots
- pool decks
- sport courts
- roofs & decks
- loading docks
- tile flooring
- stadiums
- marina docks
- moss & mildew removal

Hydro Twisters® are industrial flat-surface cleaners that connect to a pressure washer and use a spray bar rotating at a high speed within 1" of the ground to clean concrete more consistently than an operator with a wand, with less fatigue and 10-20 times faster. A surface cleaner uses much less water than a hose wash down. Hydro Twister surface cleaners can be used with cold water or up to 250° hot water, on some models, for extra stubborn grease or grime, eliminating the need for soap pretreatment in most applications.

The Hydro Twister® Advantage...

- Low Profile Deck: Will fit under benches & machinery
- Low Maintenance Swivel: Stainless & lubricated with sealed bearings
- Less Fatigue: Handle is mounted at ideal working angle
- Hose is protected inside stainless steel handle (except ANT25)
- Rustproof, stainless deck / handle and heavy duty for daily use
- Brush guard to reduce splash on building windows and operator

The **TRIDENT HYDRO TWISTERS®** clean more square footage, without zebra striping, than others in their class. A proprietary aluminum spray arm with angled nozzles to both clean up to the edge as well as push water aside to create more impact on the surface they clean. All stainless, rustproof deck and handle construction will keep your surface cleaner working and looking great for years.

The ANT24 model comes with three non-marking casters that allow the operator to freely move side to side or forward.

Model# ANT24

The ANT25 model includes a pressure adjustment feature for delicate surfaces such as decks or decorative concrete. A front non-marking caster paired with two large, airless tires reduce fatigue when working in straight lines.

Model# ANT25

The **PROFESSIONAL HYDRO TWISTER®** has a large cleaning path. The all stainless construction, including spray arm, outlasts all others in even the harshest of washing conditions. The four non-marking casters swivel for free movement while cleaning. The heavy duty skirt protects the spray arm from curb and rock damage and it has a brush splash guard to keep operator dry.

Model# ANT28

The **CONTRACTOR HYDRO TWISTER®** is the proven choice for professional surface cleaning...with four tools for your cleaning needs. The Contractor Twister combines a rotary surface cleaner, spot / gum remover, hydro broom, and an edger to create an all-in-one deluxe surface cleaner. The dual trigger guns activate either the stainless rotary spray arm or one of the other three devices. By combining four processes into one unit, you will save time and fatigue when cleaning large expanses of concrete, parking lots or other flat surfaces. The secret that makes the Contractor Hydro Twister so effective is the ideal water spray angles and nozzle heights that optimize cleaning power.

Model# ANT4C

An onboard edging tool cleans close to planters, columns, and walls or use the water broom to rinse a large area

The under-deck spot remover uses a "six-shooter" nozzle to blast away gum or paint.

Caster pivot lock allows the operator to choose to lock casters for use in straight lines or unlock for cleaning side-to-side.

Choose the Hydro Twister with the deck and nozzle size that accommodates your power washer

WATER RECOVERY SURFACE CLEANERS

The **Twister Vac** is a unique rotary surface cleaner with wash water recovery capability. Imagine how efficient you will clean without the hassle of having to do a final rinse or containing wastewater runoff. Using a Twister Vac with your existing hot water mobile wash skid, you will be able to clean flat surfaces up to 20,000 sq. ft. per hour, plus recover your wash water all in one simple step when you connect to a Hydro Vacuum® recovery system.

Stainless construction, 30" deck with brush splash guard. Requires minimum 100cfm/91" lift vacuum source, 2" vacuum hose, and a pressure washer. Suitable for use on greasy factory floors, concrete parking lots and drive-thru areas, gas stations and garages.

Model# ANTV5

Also available in a 12" composite deck version for tight areas or small touch-ups. Model# ANT12
