

HYDRO TEK *CLEANING EQUIPMENT MFG.*

BRILLIANT DESIGN, TOUGH ON GRIME

What makes a Hydro Tek the obvious choice for you?

From concept to production, our innovative team embraces efficient technology with constant improvement to give you the best value for your money.

Innovation

Powerful local dealer support network to make certain you get the maximum benefit from your investment.

Support

State of the art, ISO certified, U.S. facility and our flexible demand-pull cellular manufacturing gives us a competitive advantage to customers worldwide.

Reputation

**SMALL DETAILS
BIG DIFFERENCE**

Efficiency

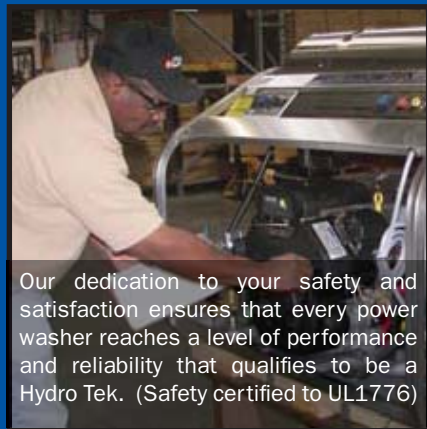

Superb fit and finish is achieved by incorporating laser and other smart technology. Labor and scrap is thus reduced to produce stainless equipment at painted steel prices.

Assurance

Hydro Tek's Lifetime Warranty on our SpiraLast™ heating coil. The SpiraLast™ coil is made using a proprietary cold rolled process.

Integrity

Our dedication to your safety and satisfaction ensures that every power washer reaches a level of performance and reliability that qualifies to be a Hydro Tek. (Safety certified to UL1776)

MOBILE WASH SKIDS

SS Steam/Hot/Cold Water
Diesel Heated – 12v Burner, Gas Engine
The **SS Series** offers versatile portability and high cleaning power when electricity is not available. Its compact size allows passage through most commercial doorways, increasing your mobility and cleaning options. The 12v burner system gives you continuous hot water at up to 250°F, allowing you to conquer the toughest cleaning jobs. The SS Series features stainless steel panels, powder coated Pro-Tect-It frame, and heavy duty components to provide years of every day use and is suitable for a variety of mounting options: on a trailer, tank skid, wheels, in a truck, or as a stationary skid.

SCX Steam/Hot/Cold Water
Diesel Heated – 12v Burner, Diesel Engine
The **SCX Series** wash skid has extra features, heavy duty components, and is designed for the **extreme duty user**. With a large, open design frame, you will have extra fuel capacity, integrated lifting / tie down points, and four-way forklift access. High efficiency, 12v burner systems and large heating coils supply hot water up to 250°F for effective grease and grime removal. The large, extreme duty diesel engines paired with heavy duty pumps are a proven choice where dependability and running multiple shifts are required.

SC Steam/Hot/Cold Water
Diesel Heated – 115v Burner, Gas Engine
The heavy duty **SC Series** skid has been the proven choice of cleaning professionals for more than 25 years because of its low maintenance requirements and reliability. This self-contained mobile wash skid is equipped with an on-board 115v generator for the convenience of running Hydro Vacuum® wash water recycling accessories while on a remote job site. The SC Series features stainless steel panels, double wall stainless insulated heat exchanger, and a rugged powder coated Pro-Tect-It frame for mounting in a pick-up, van, on wheels, or on a trailer.

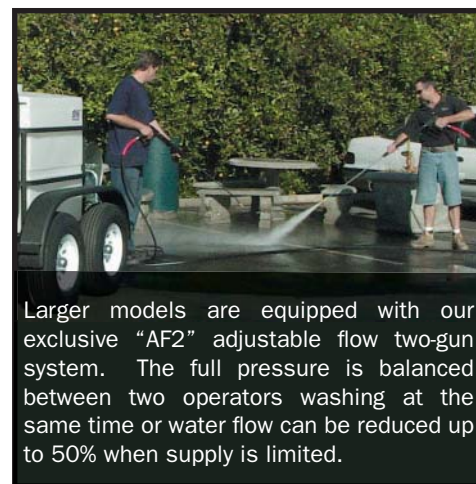

The SC Series has proven itself time and time again in commercial and industrial applications and is ideal for city, park, zoo, stadium maintenance, graffiti removal, oil field, heavy equipment cleaning, and professional contract cleaning.

CPX Cold Water
Diesel Engine
Built for the extreme duty user, the **CPX Series** is a diesel powered, cold-water pressure washer that uses the same technology and industrial components that we put into our hot water, diesel skids. These cold water wash skids have a powder-coated steel frame to protect the engine, pump, fuel tank, and other components. Multiple portability configurations: stationary, portable with a wheel kit, or truck / trailer / tank skid mounted will enable you to take the cleaning power directly to the wash site.

SCU Hot/Cold Water, Two Gun System
Diesel Heated – 115v Burner, Gas Engine
The **SCU Series** is a self-contained, high-output hot water mobile wash skid with serious cleaning power, for use with two operators. It is designed to withstand daily use by professionals who rely on its dependability and cleaning speed to make a living. The SCU includes a super high output burner with an on-board 115v generator for optional equipment such as a water recovery system. Its high impact cleaning power and rugged all stainless steel construction enables it to handle huge cleaning tasks with ease and without the need for an outside power source.

Larger models are equipped with our exclusive "AF2" adjustable flow two-gun system. The full pressure is balanced between two operators washing at the same time or water flow can be reduced up to 50% when supply is limited.

CPS Cold Water
Gas Engine
The **CPS Series** is a rugged cold water skid built to tackle tough jobs. A heavy gauge powder coated steel frame protects vital components; allowing you to take it, worry free, through the roughest terrain. The industrial engine allows you the flexibility of providing cleaning power out in the field cleaning equipment or for use at a facility. Low RPM belt drive pump, runs cooler and quieter and is ideal for use when drawing water from a bulk tank. Flexible mounting options, you choose your level of portability: on a trailer or tank skid, on wheels, or stationary.

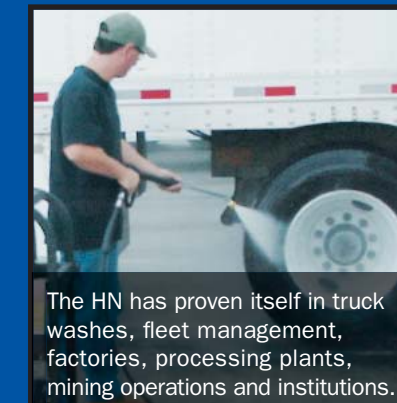

ProTowWash®
Mobile Water Tank Trailer –
Add a Hydro Tek wash skid & trailer accessories
The **ProTowWash Trailer Series** is designed with many options to meet the needs of the mobile cleaning user. This single or tandem axle trailer with smooth ride torsion suspension allows you to choose between 200 to 540 gallon water capacities and is designed to match to your Hydro Tek washer perfectly. The compact trailer is easy to maneuver, carries large water volume for working in a variety of areas without having to hunt for a water supply, and at the end of the day simply unhook to free up your tow vehicle. We factory install a variety of Hydro Tek skids and trailer accessories to meet your exact requirements. The ProTowWash is your mobile solution that hooks up quickly and promotes a professional image of your business.

Customize with your choice of hot or cold water wash skid, water tank capacity, and washing accessory options

HN Steam/Hot/Cold Water
Stationary, Multi-fuel Heated,
Electric Motor 208,230,460 volt
The **HN Series** is a stationary pressure washer that can be heated by diesel, natural gas or L.P. Choose natural gas or liquid propane if clean burning fuel is preferred. The low speed belt driven pump system is built for reliability along with other standard features such as full pressure soap injection and automatic ignition burner. Many features available that vary by model include bypass cool for pump protection, automatic shutdown to conserve energy, hour meter, wall mount remote, and even stainless frame options.

The HN has proven itself in truck washes, fleet management, factories, processing plants, mining operations and institutions.

ProTowWash®

Mobile Water Tank Trailer –

Add a Hydro Tek wash skid & trailer accessories

The **ProTowWash Trailer Series** is designed with many options to meet the needs of the mobile cleaning user. HN Steam/Hot/Cold Water Stationary, Multi-fuel Heated, Electric Motor 208,230,460 volt

The **HN Series** is a stationary pressure washer that can be heated by diesel, natural gas or L.P. Choose natural gas or liquid propane if clean burning fuel is preferred. The low speed belt driven pump system is built for reliability along with other standard features such as full pressure soap injection and automatic ignition burner. Many features available that vary by model include bypass cool for pump protection, automatic shutdown to conserve energy, hour meter, wall mount remote, and even stainless frame options.

The HN has proven itself in truck washes, fleet management, factories, processing plants, mining operations and institutions.

ELECTRIC PRESSURE WASHERS

HD Steam/Hot/Cold Water Diesel Heated, Electric Motor 115, 208, 230 volt

Your need for portability and high power are matched by the reliable and easy to use **HD Series** pressure steamer. You can easily move it to various cleaning sites with its double lift handles and four wheels. The HD Series features rustproof stainless steel frame, handles, panels and coil protection. The adjustable chemical valve, temperature control with steam setting and multiple nozzles deliver better cleaning in an array of applications. The efficient heat exchanger with stainless enclosure is designed to use less fuel, up to 8 hours of use before refueling.

The HD Series provides value long into the future and is ideal for farm and facility maintenance, auto detailing, sanitizing, degreasing, and much more.

HP Steam/Hot/Cold Water Diesel Heated, Electric Motor 208, 230, 460 volt

The **HP Series** applies an exceptional heat rise to its high water output to increase your cleaning speed. It also produces wet steam at full output pressure to tackle your toughest cleaning applications. The convenience of auto on/off, soap injection, and adjustable pressure give you complete control at the spray gun to save time, electricity, and pump wear. The rustproof all stainless construction and dependable design give you years of trouble free service, even when used every day.

The stainless HP outlasts other pressure steamers and will prove its ability to clean faster on heavy equipment, greasy floors, dirty walls, oily steel, or any grime-ridden surface. An invaluable piece of cleaning equipment preferred by institutions, facilities, restaurants & maintenance yards – anywhere electrical power is available or preferred and grease and grime needs cleaning.

CW Cold Water, Electric Motor 115,208,230,460 volt

The **CW Series** is emission-free making it ideal for indoor installations to blast away grime from flooring and machinery. The base unit can be installed, away from the wash area, creating multiple wash bays by incorporating wall mount remote controls. The CW Series is capable of using up to 190°F inlet water through the pump, from your existing hot water heater, to provide high-pressure hot water for sanitizing without emissions or the expense of purchasing a hot water pressure washer. Mount the CW pressure washer on the wall to free up floor space or you can add wheels, either way the all stainless construction and industrial duty components won't let you down.

The CW is always ready to clean up at manufacturing and food processing plants, bakeries, car and truck washes, facilities and institutions; anywhere electrical power is available and repetitive cleaning is needed.
